

ALEXANDER STACK

Frontend Software Engineer | Angular | TypeScript | React | REST APIs | Playwright | Jest

Minneapolis, MN | (612) 719-1995 | alex_stack012@live.com | alexstackcodes.com | github.com/alexstack012 | linkedin.com/in/alex-stack

SUMMARY

Frontend-focused Software Engineer with 4+ years of experience building enterprise Angular, TypeScript, and REST API-driven web applications. Strong background developing reusable UI components, scalable frontend architecture, Angular Material interfaces, responsive layouts, accessibility improvements, and frontend test optimization. Experienced in Agile teams, API integration, debugging across frontend/backend workflows, and supporting QA through unit testing, regression testing, Playwright E2E setup, and cross-browser validation.

CORE SKILLS

Frontend: Angular 7-15 and 21, TypeScript, JavaScript ES6+, React, Next.js, Angular Material, Material UI, RxJS, HTML5, CSS3, SASS, Responsive Design, Accessibility, SPA Architecture

Testing / QA: Playwright, Jest, Vitest, Node Test Runner, Unit Testing, Component Testing, E2E Test Setup, Regression Testing, QA Testing, Cross-Browser Testing, Test Optimization, Postman

Backend / APIs: REST APIs, Node.js, Express, Java/Spring Boot, Python, JSON, XML, Flowable, MySQL, PostgreSQL, MongoDB

Tools / Practices: Git, GitHub, GitLab, Jira, Figma, Nx, Cloudflare Workers, Vite, Agile/Scrum, CI/CD, API Integration, Role-Based Access, Performance Optimization

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer - Angular, React & Web UI Projects

Remote | Aug 2025 - Present

- Developed responsive websites, landing pages, and single-page applications using Angular, React, TypeScript, JavaScript, HTML, CSS, and modern UI practices.
- Built and launched a React/TypeScript portfolio using Vite, Cloudflare Workers, responsive UI design, optimized image assets, and custom domain configuration.
- Delivered a client website for AG Inspire using Angular 15, Angular Material, reusable components, and mobile-first styling from requirements through deployment.
- Configured hosting, DNS, SSL, custom domains, redirects, and deployment workflows using Cloudflare, GitHub, Wrangler, InMotion Hosting, and traditional hosting providers.

Brooksource / Centene - Mid-Level Software Engineer

Remote | Aug 2023 - Aug 2025

- Developed and enhanced enterprise Angular applications using Angular 13-15, TypeScript, Angular Material, REST APIs, and reusable component patterns.
- Built and maintained components, services, pipes, API-driven UI workflows, and frontend architecture patterns to improve scalability, consistency, and maintainability.
- Improved a frontend test suite of 6,000+ unit tests by removing duplicate and unused tests, reducing total runtime by approximately 40%.
- Integrated REST APIs and debugged frontend/backend data flow issues to resolve UI defects, workflow failures, and application behavior problems.
- Maintained event-driven backend workflows using Flowable, XML, and Python scripting while collaborating with product, QA, design, and backend teams in Agile/Scrum.

Doran Jones Inc. - Software Engineer

Remote / Tampa, FL | May 2022 - Aug 2023

- Built and maintained enterprise Angular applications using Angular 7, Angular 13, TypeScript, Angular Material, REST APIs, and Nx monorepo architecture.
- Developed secure UI workflows, validation features, reusable components, and role-based user interactions for a Fortune 50 client.
- Supported backend integration using Java/Spring, SQL, and REST API-driven application workflows while improving frontend organization and build reliability.
- Participated in Agile ceremonies, code reviews, debugging sessions, and cross-functional collaboration with engineering teams.

Outspoke - Full Stack MERN Developer Intern

Remote | Feb 2022 - May 2022

- Built responsive React user interfaces using JavaScript, Material UI, HTML, and CSS while assisting backend development with Node.js, Express, and MongoDB.
- Performed QA testing across browsers and devices to improve responsiveness, usability, and accessibility in collaboration with developers and designers.

OPEN SOURCE & PUBLIC GITHUB PROJECTS

TTCA - Tabletop Campaign Archive | Full-Stack Angular Application (In Progress)

GitHub: github.com/alexstack012/TTCA

- Built a full-stack tabletop campaign archive using Angular 21, TypeScript, Express 5, and PostgreSQL, with protected archive routes and separate editor and read-only demo experiences.
- Implemented HMAC-signed sessions, role-based API authorization, rate-limited authentication, Helmet security headers, CORS configuration, and production environment validation.
- Designed REST API routes, repository-layer PostgreSQL queries, database migrations, and seeded campaign data for characters, locations, entities, and session logs.
- Created searchable campaign-log workflows with loading, error, empty, and populated states, expandable details, typed Angular services, and frontend/backend automated tests.

Northstar Workforce Dashboard - Angular SaaS Dashboard

GitHub: github.com/alexstack012/northstar-dashboard

- Built a production-style Angular dashboard simulating a multi-tenant workforce management platform with feature-based routing, authentication flow, route guards, and scalable folder architecture.
- Modeled users, tenants, jobs, and candidates with TypeScript interfaces and db.json mock data to demonstrate API-driven UI patterns and maintainable frontend architecture.
- Configured Playwright E2E testing foundation for login, routing, and dashboard workflow coverage while continuing to expand automated test scenarios.
- Documented enterprise Angular patterns including reusable constants, TypeScript models, security-conscious demo authentication utilities, and setup steps.

Personal Portfolio - React / TypeScript SPA

Live: alexstackcodes.com | GitHub: github.com/alexstack012/personal-portfolio

- Designed, optimized, and deployed a responsive React/TypeScript portfolio using Vite, Cloudflare Workers, WebP image optimization, custom domain routing, and modern frontend tooling.

Freelance Frontend Project - AG Inspire

Live: aginspire.org

- Coordinated directly with the business owner to deliver a mobile-friendly Angular 15 single-page application using Angular Material, custom components, TypeScript, HTML, and CSS.

ADDITIONAL EXPERIENCE

U.S. Army Reserve - 68J Medical Logistics Specialist

Fort Snelling, MN | 2009 - 2017

- Managed medical logistics, inventory readiness, supply chain coordination, and operational planning for a Combat Support Hospital.

EDUCATION

Coding Dojo - Software Development Certificate | Full-stack training in MERN, Java/Spring Boot, and Python/Flask | 2021

-Completed an intensive, full-time remote coding program covering four technical stacks. Successfully navigated rigorous 5-hour practical examinations for each milestone, developing functional web applications from wireframe specifications. Mastery of Web Fundamentals (HTML/CSS/JS), Python/Flask/MySQL, Java/Spring Boot/MySQL, and the MERN stack (MongoDB, Express, React, Node.js). Demonstrated strong remote collaboration skills via Zoom-based lectures and cross-functional group development, totaling approximately 1,000 hours of hands-on software engineering experience.

Lakeville South High School | High School Diploma | Completed early for Army enlistment | 2007 - 2010
